

Workplace Occupancy Sensor & Space-Planning Software Integration

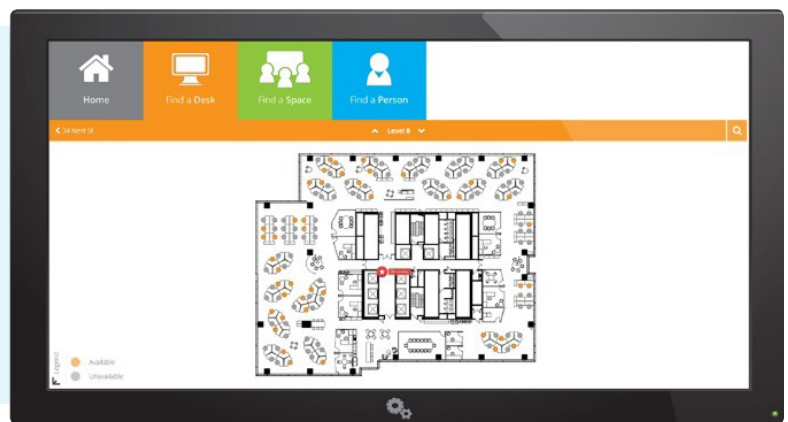

INTRODUCING THE NEXT GENERATION OF SMART BUILDINGS AND DATA-DRIVEN WORKPLACE MANAGEMENT.

Gain a complete and accurate understanding of your workspace as well as the ability to plan for your future real estate portfolio, when you leverage the Condeco Serraview integration. Through this integration, Condeco's workspace occupancy sensor data will feed different apps within Serraview's space-planning tool.

Serraview's Kiosk will display Condeco's real time occupancy data, enabling employees to see occupied desks and reserve them instantly.

SERRAVIEW KIOSK

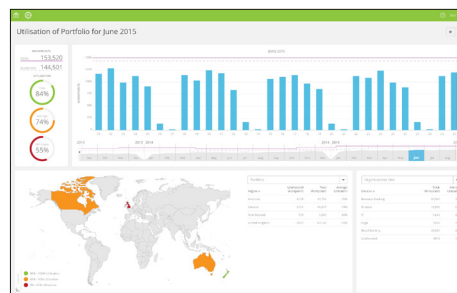

Benefits

- ✓ Visualize workplace utilization via dashboards, charts, floor plan overlays and heat maps
- ✓ Develop multiple scenario plans faster
- ✓ Manage hot desk areas in real time
- ✓ Improve employee experience in an agile working workspace environment (see workspace availability instantly with a kiosk)

CONDECO SENSE DATA WILL FEED INTO SERRAVIEW'S ANALYSIS AND PLANNING APPS, INCLUDING:

- Interactive stack planning
- What-if scenario planning
- Executive workplace reporting
- Neighborhoods & ratio seating management

Condeco develops and delivers workplace management solutions that improve and streamline the way people work and how organizations operate across the globe, specifically we provide: Room and Desk booking software, digital signage and occupancy sensors.
